

VOTE NO on Article 59

Keep Alton's Future in Our Hands *Don't Fund Lakes Region Planning Commission*

Curious about frequent radio public service ads pushing regional planning?

Original intent given for regional planning commissions (RPC's)...Enable towns to share resources such as schools, fire services, etc

But... Their mission now encompasses regional water districts..

Even more concerning... N.H. RSA 35:56 grants a regional planning commission abutter status. Thus, LRPC's unelected officials can wield influence and do require submission of plans (paid for by the applicant) for their review during our local process for proposed developments.

Why You Should Vote to Keep Alton OUT of LRPC

Outside forces dedicated to the 1992 United Nations "sustainability" agenda (see *U.S. State Dept. website*) will work to make our local decisions comply with an elitist agenda of global central planners.

Strings Are Attached... RPC's accepting certain federal money must comply with requirements. An example is HUD's (Housing and Urban Development) program AFFH established by the Obama administration. AFFH (Affirmatively Furthering Fair Housing) is tied to RPC's accepting certain federal funds. Towns accepting these "grants" must sign/honor a contract.

What Your NO Vote on 59 Means for Alton

Continuing to plan for ourselves free of excessive outside influence over local housing, transportation and water management choices.

Saving the \$7,619 LRPC membership fee to use this \$ on needs **we** determine

Freeing us from a vicious cycle whereby our own taxpayer money can't come back to us until we submit to the requirements of unelected D.C. bureaucrats.

NO on 59 IS THE WAY TO GO

(See more info at granitestatefutures.org. Also study the financial pie chart on LRPC's website).
